

## Cloud Backup and Recovery Services

Computers are the default storage medium for most businesses and virtually all home users. Because portable media is quickly becoming an outdated and expensive method for safeguarding important data it is essential to secure critical business assets and personal information with an easy-to-use, automated, online backup service. Our backup, archiving and recovery service is a powerful, yet simple to use solution and comes equipped with encryption backup tools previously available only to Fortune 500 companies. With an interface designed to be used by anyone in any size organization, this proven technology is user-friendly, reliable, ultra-secure and cost-effective.

### Unbeatable Security

Ensuring that no one but you can ever access your data is a top priority to us.

### Retention and Archiving

Rest assured that our online backup is a compliance-ready digital archiving solution.

### Restoration 3X Faster

Files are available the moment you need them.

### Continuous Data Protection (CDP)

For documents that change rapidly and need continuous data protection, Set CDP to automatically send changes every 15 minutes.

### Block-Level Backup

Once a file has been saved once, our software backs up only changes, down to the block level.

### Flexible Scheduling

Welcome to complete scheduling flexibility. Each backup set can be set to run at any user-defined time, on any user-defined frequency. There are default settings, of course, but every aspect of the schedule is easily configurable.

### Microsoft Exchange Support

We have developed Exchange Store specifically to manage backup, storage, and restoration of Exchange files.

Easily backup, review and manage your online backup account

Quick access to frequently used tasks

The screenshot shows the ARXIS backup software interface. At the top, there's a navigation bar with 'Home' and 'Backup Sets'. Below it is a toolbar with icons for 'My Account', 'Backup Sets', 'Restore', 'Delete', 'Activity', 'Diagnostics', and 'Preferences'. A status bar on the right indicates 'You are currently using 2.84 GB of 5.00 GB.' with a progress bar. The main content area is divided into two sections: 'Status and Summary' and 'Scheduled Actions'. The 'Scheduled Actions' section lists several 'Next File backup (My Important Files)' tasks with their respective dates and times (e.g., 4/11/2009 2:00 AM). On the left side, there's a sidebar with 'I want to...' and various tasks like 'View Account Summary', 'Create A New Backup Set', 'Restore Files', 'View Current Activity', 'Manage Plugins', and 'Edit My Preferences'. Below that is 'Account Info' showing 'Username: thundercat', 'Subaccount: 0000', and 'Storage Used: 0.00 B'. At the bottom, it says 'Version 3.0.9.2792'.

Always know how much data you've backed up
