Macromedia Flash plug-in version 7

## The New Standard in Interactive Data Visualization

It's a tough crowd. You have to present business data to your colleagues, but you know audiences are easily bored by mind-numbing spreadsheets. And traditional charts and graphs aren't much better – static, staid, and standardized, they've all begun to look the same.

Until now. Now, all that has changed.

Crystal Xcelsius™ makes it easier than ever for you to create engaging, interactive dashboards and business presentations from ordinary spreadsheets – giving you greater insight into your data, and ensuring you and your audiences make smart decisions.

*Transform your ordinary Excel spreadsheets into interactive dashboards.*

## How It Works

Crystal Xcelsius is an intuitive PC application designed to create engaging, interactive dashboards from ordinary Excel spreadsheets. It is tightly integrated with Microsoft Office products and requires no programming. Using a simple point-and-click interface, Crystal Xcelsius transforms Excel data and formulas into interactive

dashboards, animated charts and graphs, financial presentations, and business calculators – all of which output directly to PowerPoint, Word, PDF documents, and the web.

**Import** an existing Excel spreadsheet.

**Create** a visual data presentation with point-and-click Crystal Xcelsius.

**Output** your presentation or dashboard to Microsoft Office documents or the web.

## Benefits

Bridging the gap between data analysis and visual presentation, Crystal Xcelsius lets you present and interact with business data in ways that previously were unachievable. With Crystal Xcelsius, you have the power to create interactive and audience-friendly reports, in the form of:

- Dashboards and scorecards
- Dynamic charts and graphs
- Visual business analytics
- Pro forma budget consoles
- Business presentations
- And much more!

With Crystal Xcelsius, you easily communicate results to colleagues, integrating your interactive data visualizations and models – with one click – into PowerPoint slides, Word documents, PDF documents, Outlook, and the web.

The result – faster, more intelligent business decisions that let you capture lucrative market opportunities – before your competitors even realize they exist.

## Features

**Point-and-click ease.** Crystal Xcelsius' intuitive interface includes prebuilt components, skins, maps, and animated charts – and one-click export – making it easy for nontechnical users to create interactive dashboards and data presentations.

**Stunning presentation.** Custom graphics and interactivity allow you to develop and present compelling yet easy-to-understand financial models and business summaries. You can present fully interactive presentations in Microsoft Office, PDF documents, the web, intranets, and portals.

**Visual modeling.** Visual sliders and dials on the screen allow you to quickly evaluate multiple what-if analyses by altering the underlying assumptions, and immediately see the impact on the results directly on the dashboard.

**Platform Independence.** Crystal Xcelsius visual models can be exported – with one click – to PowerPoint, Word, PDF, Outlook, and the web. Models run on any PC, Mac, handheld, or other device supporting the free Macromedia Flash player.

**Language Support.** Crystal Xcelsius is available in Dutch, English, French, German, Italian, Japanese, Spanish, Simplified Chinese, Traditional Chinese, and Korean.

## Availability

Crystal Xcelsius is available in two editions:

**Crystal Xcelsius Standard** is the perfect way to get started in the exciting area of interactive data visualization. You get point-and-click ease, and all the functionality you need for innovative data presentations – including maps, animated charts, tools, and extensive custom design capabilities.

**Crystal Xcelsius Professional** is for those who want to take their dashboards and data presentations to the next level. You receive all the capabilities of Crystal Xcelsius Standard, plus many advanced visualization components and key features – like drill-down animated charts, one-click export to PDF, broad Excel function support, and more.
