

Arxis Technology Named as Technology Pacesetter Award Recognizes Leading Mid-Market Technology Consulting Firms for Leadership, Innovation, and Adaptability

Arxis Technology, a technology consulting firm specializing in the implementation and support of business management applications including Sage Accpac, Sage MAS, SageCRM, SAP Business ByDesign, and Adaptive Planning has been chosen as a “Technology Pacesetter” for 2011 by the editors of Accounting Today. This is the ninth consecutive year that Arxis Technology has been included on this prestigious list of firms from across North America.

Los Angeles, CA ([PRWEB](http://www.prweb.com)) November 16, 2011 -- Arxis Technology, a technology consulting firm specializing in the implementation and support of business management applications including Sage Accpac, Sage MAS, SageCRM, SAP Business ByDesign, and Adaptive Planning has been chosen as a “Technology Pacesetter” for 2011 by the editors of Accounting Today. This is the ninth consecutive year that Arxis Technology has been included on this prestigious list of firms from across North America.

Seth Fineberg, Technology Editor, wrote, “For years, the members of our Technology Pacesetters list of topflight accounting and ERP value-added resellers remained nimble, often adapting to change sooner than later. More recently, they’ve begun to usher in one of the larger evolutions in the sector ... by offering expanded product lines including cloud or hosted solutions and, in some instances, providing more consulting services than traditional software reselling.”

“We’re proud to once again be honored as a ‘Technology Pacesetter,’” said David Cieslak, Arxis Principal, “and are excited to deliver the benefits of cloud computing to small- and mid-sized businesses with products such as SAP Business ByDesign, Adaptive Planning, and SageCRM.”

“The cloud offers any sized business the advantages of world-class infrastructure, anywhere / anytime / any device access, and predictable IT costs,” Bob Gaby, Arxis Principal, added. “Enabling our clients to simplify their IT infrastructure and focus more effectively on their core business is truly rewarding,” said Gaby.
